

**ABSTRACT OF THE DISCLOSURE**

**An image data processing system comprising;  
an image inputting section for inputting image data;  
an image processing section that performs image**

**5 processing on the input image data to create image data for  
printing;**

**a first controlling section that performs controls over said  
image inputting section and said image processing section; and**

**10 an image transmitting section capable of simultaneously  
transmitting said image data for printing to a print preparing  
device and to an image storing device, characterized in that  
said image storing device includes;**

**an image receiving section that receives said image data  
for printing that are transmitted from said image transmitting  
15 section; a storing medium for storing the received image data;  
and**

**a second controlling section that performs controls over  
said image receiving section and said storing medium.**
